**FIGHT THE FISH, NOT THE ROLL WITH SEAKEEPER GYROS  
THIS OFFSHORE TOURNAMENT SEASON**

Poor seas can lead to nausea, fatigue and lost days on the water. Revolutionizing the fishing experience, and changing boating, Seakeeper Gyro Stabilization Systems deliver a powerful righting force that quickly stabilizes a boat in any condition. Seakeeper is a Gold Level Sponsor in this year's Big Rock Blue Marlin Tournament, as well as The Pirates Cove Billfish Tournament. Whether fishing in rough waters at zero speed, low trolling speed, or running to a targeted destination, the advanced Seakeeper Gyro virtually eliminates boat roll for unmatched comfort, safety and fish-fighting effectiveness. Actively controlled, the system calculates the impact of each wave and compensates before it can be felt. Completely-sealed, the compact unit is quiet, draws little power, offers a straightforward installation and is virtually maintenance free.
