Seakeeper Wins 2019 Edison Award*Seakeeper 2 Earns Gold Designation in Transportation Technology Category*

CALIFORNIA, Md. (April 5, 2019) – Seakeeper, Inc., the leader in marine stabilization, received an Edison Award at last night's Awards Gala for the Seakeeper 2.

The Edison Awards honor excellence in new product and service development, marketing, human-centered design and innovation. The Seakeeper 2 was chosen as a finalist in the Transportation Technology category earlier in the year and last night received a gold award, the highest available. Products were judged on their concept, value, delivery and impact and finalists were chosen by a steering committee and small group of industry experts where necessary. The finalists were then submitted to a panel of more than 3,000 judges comprised of senior business executives and academics who then cast ballots for gold, silver and bronze winners.

“We’ve been relentless at working to change a fundamental human experience by making boating more accessible and enjoyable for everyone, and the introduction of our smallest product, the Seakeeper 2, is a huge step in realizing that mission,” said Seakeeper President & CEO Andrew Semprevivo. “We’ve been pushing ourselves every day for 11 years to bring our best innovations to market, and we’re honored to be recognized as a leader and proud to stand next to the other incredible Edison Awards winners this year.”

The award was presented at the Edison Awards’ annual black-tie event at the New York Academy of Sciences in New York, NY. Events earlier in the day included a Meet the Innovators Forum and an Innovators’ Showcase where participating companies had the opportunity to connect with other finalists and innovators and share their product.

About Seakeeper Inc.

Founded in 2003 by a successful entrepreneur and a naval architect, Seakeeper is the global leader in marine stabilization. Seakeeper’s innovative technology changes the boating experience by eliminating up to 95 percent of all boat roll, the rocking motion that causes seasickness, fatigue and anxiety. Since selling its first Seakeeper in 2008, the company has developed a growing catalog of models for an expanding range of boat sizes. Based in California, Maryland, USA, the company has more than 200 employees globally, based in the U.S., U.K., Italy, Germany and Singapore.

About the Edison Awards™

The Edison Awards is a program conducted by Edison Universe, a non-profit, 501(c)(3) organization dedicated to recognizing, honoring, and fostering innovation. The awards are named after Thomas Alva Edison (1847-1931) whose inventions, new product development methods and achievements changed the world.
