

VIKING 80 CONVERTIBLE SEAKEEPER 40 REFITS

PRODUCT Seakeeper 40

Attention Dealers:

Effective with Hull 80-717, the Viking Factory made structural grid modifications to provide an alternate mounting location to accommodate the Seakeeper 35. With the launch of the Seakeeper 40 and an influx of Seakeeper 26 to 40 opportunities on the Viking 80C, it is vital to cross-reference the Hull Identification Number (HIN) to confirm if the vessel can accept a Seakeeper 40. All Viking 80 Convertibles with a hull number of 80-717 or later can accept a Seakeeper 40. Hulls built prior to 80-717 would require removal of the existing structural grid, with modifications to the rudderboard and installation of new foundation insert plates.

The HIN will be located on the upper starboard corner of the transom and contain the Viking hull number and year of manufacturing.

Example:

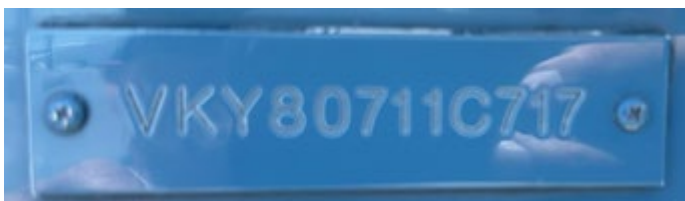

HIN 80739F122

Viking Hull #: [80-739](#)

Year: 2022

Capable of accepting a Seakeeper 40

HIN 80711C717

Viking Hull #: [80-711](#)

Year: 2017

Not Capable of accepting a Seakeeper 40
